CLIP User Manual

1　Registration

1、 Install Chrome browser https://www.google.com/chrome/

2、 Install Metamask extension https://metamask.io/

3、 Instal Metamask standard blockchain of your choice

4、 Open website：http://52.9.166.20/#/home

5、 Through Metamask register CLIP Dapp
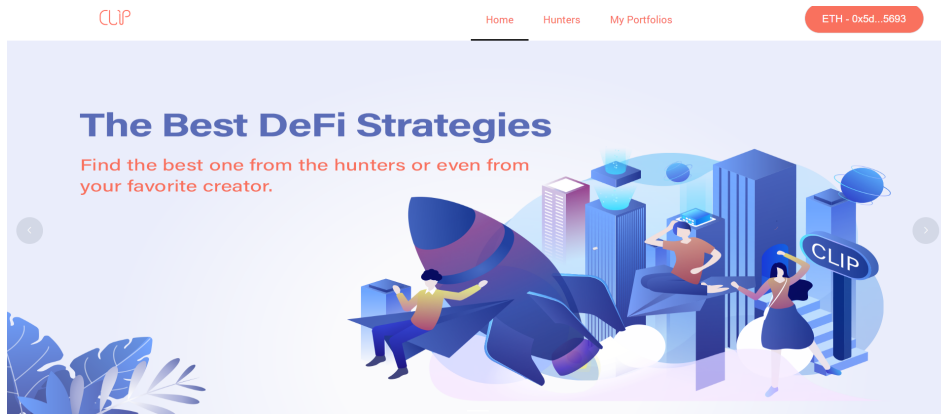

2 User Guide

1、 Users find the strategy they want to invest using the Projects Display section on the homepage, and click the Invest button next to the strategy。

Projects Display

Investing	Mining	Finished					
name	Start time	Fund scale	Previous APY	End Time	Completion	hunter	
20221006	2022-10-08	10.00	317.39%	2022-10-31	0%	Eric	Invest

2、 Strategy details include name, start time, status, fundraising amount, expected APY, end time, Hunter, and fundraising completion.

Project Information

Name:20221006

Start time:　2022-10-08

State:　investing

Fund scale:　10.00 USDT

Expected APY:　317.39%

End Time:　2022-10-31

Hunter:　Eric

Completion:　0%

3、 Click Approve to authorize. After the authorization is successful, enter the investment amount and click the Invest button. After the investment is completed, view the status

of the investment in My Portfolios

3. Register to become a Hunter

1. Anyone can apply to become a Hunter.

2. Below the image on the home page, click Apply to become a Hunter.

3. The more comprehensive the Hunter information is, the higher the user's understanding will be.

4. The email must be filled in correctly. The platform will send an early warning email to Hunters based on their strategy. For example, if the loss of the strategy reaches -20%, the strategy is about to liquidate. If Hunter does not see the warning email and the strategy is liquidated, the loss will be borne by Hunter

4. Hunter Operating Explanation

1、Hunter through the Console creates a strategy
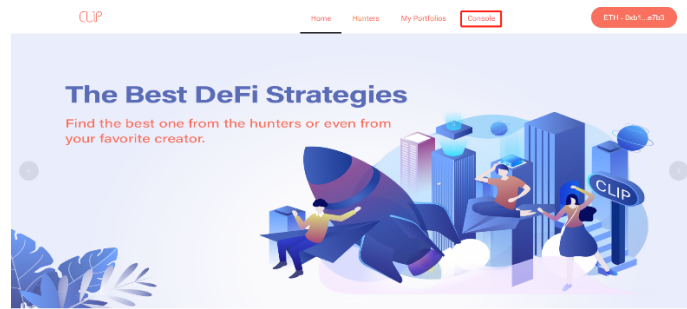

2、 Click Publish New Asset to create a new strategy

Eric	**male**	**26**
name	Gender	Age

Contact information

ⓘ Email：13111531@qq.com　ⓘ Twitter：bankofmining　ⓘ Facebook：test1

Business Experience

With 3 years of experience in the encryption industry and 2 years of experience in defi, it has its own judgment criteria to support different strategies.

Publish New Asset

3、 For configuration, select the main network, protocol and trading pair, click the Add button to add a piece of information. You can add multiple pieces of information according to the needs of the strategy

Publish New Asset

Attention

(Please add any necessary information you think here)

Configuration

* Network	ETH				id	Network	Finance	Para	do
* Finance	Uniswap_V3		Add		1	ETH	Uniswap_V3	USD	remove
* Parameter	USDT-UNI								

4、 Configure the details, strategy name, fundraising amount, expected goal, start and end

time

5、 Click the calculate button. In the initial period, the Hunter only needs to pledge 1USDT. During the public beta period, the Hunter needs to pledge 50 USDT. After official launch, the amount of CLIP that Hunter needs to pledge is calculated according to various parameters.

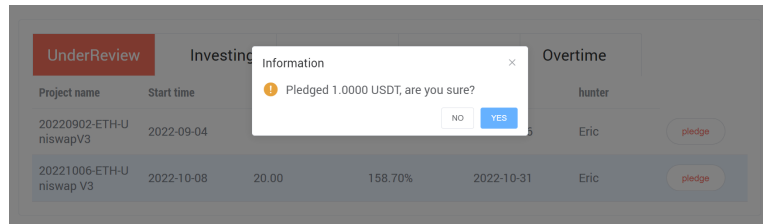

6、 Click Submit to trade

7、 In the Projects Display section of the Console menu, you can see the information of all strategies created by Hunter.。

Projects Display

UnderReview	Investing	Mining	Finished	Overtime		
Project name	Start time	Fund scale	Previous APY	End Time	hunter	
20220902-ETH-UniswapV3	2022-09-04	10.00	1825.00%	2022-09-06	Eric	pledge
20221006-ETH-Uniswap V3	2022-10-08	20.00	158.70%	2022-10-31	Eric	pledge

8、 Click the Pledge button in the policy information， continue staking。

9、 Click Yes, transfer to Metamask, click OK, completed staking

10、 After the stake s successful, the platform will create a fundraising contract after a few minutes. The fundraising contract is created and put on chain, and the strategy you just created can be seen as an Investing status。

11、 Other users can see this strategy on the homepage. The investment cycle is 24 hours. If the fundraising is completed in advance, the strategy will automatically convert to Mining status. If the fundraising is not completed within 24 hours, it will enter the Overtime status.

After the investment is completed and automatically converts to Mining status, the Hunter needs to click the Mining button to perform strategic operations.

Projects Display

	name	Fund scale	Previous APY	Current APY	End Time	hunter	
UnderReview	Investing	Mining		Finished	Overtime		
>	20220908-USDT-WETH-V3	5.00	3650.00%	-2,879.3198%	2022-09-12	Eric	mining
>	20220915	15.00	1216.67%	16,925.0819%	2022-09-19	Eric	mining
>	20220917-BSC-pancake	5.00	173.81%	1,451.8261%	2022-10-31	Eric	mining

12、　　　If the strategy only has Ethereum's protocol and transaction pair, the Hunter does not need to be cross-chain when it is in the Mining status

ETH
mutilchain
CROSS

| ETH | - | BSC |

| USDT |

Amount　—　100.00　+

Balance:5.00

13、　　　CLIP Cross-chain operations are completed by contract interaction with cross-chain bridges, so Hunters need to pay attention to cross-chain requirements when transferring cross-chaining. Currently, other chains cross-chain to Ethereum 40USDT，it will be adjusted in real time

Ethereum crosses the chain to other chains, the minimum cross-chain amount is 12 USDT
The other chains crosses to Ethereum, the minimum cross-chain amount is 50 USDT.
If the cross-chain amount is less than the minimum amount, it maybe lost.
It should be handled carefully.

14、　　　Currently will focus on protocols including Ethereum and Uniswap V3 and BNB Chain and PancakeSwap。

15、　　　Uniswap V3 currently has Swap functions，for Liquidity due to the large number of parameters at present, the page has not been perfected and has not been opened for the time being. PancakeSwap includes Swap、Liquidity and Farming for standard use，Also Swap and Liquidity create PancakeSwap，Farming and staking LP Token

16、　　点击此信息，进行 LP Token 质押，点击+按钮，将 LP Token 数量进行复制粘贴，并点击 Submit。

17、　　Open MetaMask and click OK to complete the LP Token pledge. Click the - button when revoking the pledge, and perform the same operation.
